

# Calpendo

# Calpendo Activity Recorders

The Calpendo Activity Recorders (CAR) are the number 1 solution for all Actual Usage tracking, monitoring and billing requirements

- Monitor who is using your instruments, when they are using them and for how long.
- Generate bespoke comparison reports to highlight the differences between booked and actual usage.
- Create alerts to remind users if they are using more than their allotted time.
- Automated billing can be calculated from the actual time used, the booked time or a combination of the two.
- Configuration can optionally ensure instruments and machines can only be accessed by recognised users and prevent unauthorised logins.
- CAR can be utilised either as part of a full Calpendo or as a stand alone system.

## Demo CAR With a 14 day free trial

Book in a bespoke demonstration and trial a fully configured CAR or Calpendo system.

## Unlimited Support

All Calpendo and CAR systems include unlimited training and customer support for your configuration

To book your **FREE CAR demonstration** or to start a **FREE trial**, please visit [www.calpendo.com/car](http://www.calpendo.com/car)
